MEMORANDUM THRU

FOR

SUBJECT: ULLS-G Certification Training Requirements for Medical Equipment Repairers,
MOS 91A

1. References. AR 750-1 dated 18 August 2003, AR 700-138 dated 26 February 2004, and FORSCOM Letter of Authorization for ULLS-G and SAMS-1 Fielding.
2. In order to progress toward Army objectives to transform maintenance operations, improve readiness, and achieve total asset visibility the DA has authorized ULLS-G for medical equipment maintenance management programs. The Basis of Issue Plans (BOIP) for Army STAMIS has been modified to include medical maintenance programs in all TOE medical units where there is a 91A authorized. This plan includes all Army components. The Medical
3. Unit Level Logistics System – Ground training is a required for 91A assigned duties as the ULLS-G Clerk in TOE medical units. This memorandum applies to all Army components. Proficiency in using the application is the most critical aspects of the transition from TAMMIS MEDMNT to ULLS-G.
4. As with all training, command emphasis is important as well as notification of higher headquarters when training is complete. Commanders and leaders in TOE medical units are asked ensure that an assigned 91A attend official ULLS-G certification training. The training is available at garrison troop schools.
5. 91A with this responsibility should pursue certification training immediately by contacting the BN S-3 Shop. Until recently ULLS-G has been used to manage maintenance of aircraft, watercraft, and ground equipment therefore examples and terminology may appear inapplicable during certification training, but the concepts apply to medical equipment as well. At this point medical equipment is treated the same as ground equipment — the difference is that medical equipment is supply class VIII not class VII and IX. Therefore it is also essential to become familiar with using T-CAM as well.

MOS 91A

6. Therefore, until software changes are approved and completed, adjustments in ways medical repair parts are obtained is necessary. This supports the importance of training and the role of leadership involvement. Units are asked to report certification training status of 91As to the MACOM leadership. MACOM Commanders or G-4 representative should report ULLS-G training status to USAMMA. ULLS-G Training Status Reports may be emailed to the USAMMA EOC at: USAMMAEOC@amedd.army.mil .
